

## Question: what are the staking pools that I can join?

- Dudezmobi
- Ginasis

A staking pool has advantages and disadvantages over solo staking:

## Disadvantages:

- 1. It causes centralization on the network
- 2. The pool owner is in control of **all** funds in the pool, including yours.
- 3. You need to trust the pool operator to share the rewards fairly.
- 4. You need to trust the pool operator to release your funds back to you on request.
- 5. You need to trust the pool operator to securely run the pool 24/7.

## Advantages:

1. You don't need to run your wallet 24/7 in native mode.

Warning: Do your own research before you decide anything!
